

The given White Paper record has been figured to introduce the Dtrack undertaking potential members of the platform and those keen on investing in its development. The data set out underneath may not be comprehensive and does not suggest any authoritative relationship. Its sole reason is to give data to our potential investors (Token holders), so they may decide if they are ready to dissect the organization with the aim of getting Dtrack Tokens.

No piece of the given White Paper will be regarded to comprise a plan or a sales for commitment, nor does it in any capacity related to an offering or a sales of an offer to purchase any securities in any jurisdiction.

The given document is not composed in accordance with, nor subject to, any laws or regulations of any jurisdiction aimed at protecting contributors. Certain statements, estimates, and financial information contained in the given White Paper constitute forward-looking statements. Such forward-looking statements or information deem risks and uncertainties, which may cause actual events or results to differ materially from the estimates or results implied or expressed in such forward-looking statements.

The given English language White Paper is the primary and sole official source of information about the Dtrack project and its Token launch.

The information contained herein may be translated into other languages or used for establishing written or verbal communication channels with potential partners or contributors to the project. As a result of translation, some information contained herein may be omitted, corrupted, or misrepresented. In the event of inconsistencies between any translations or communications and the given official English language White Paper, the provisions of the given English language original document shall hold primary status and prevail.

Dtrack PLATFORM claims all authority to acquaint changes with the given White Paper. On account of a distinction or differences between the renditions of the record, the latest variant of the White Paper distributed on the dtrack.org site will win, and all already distributed renditions are considered to be invalid in the entirety of their cycles and portrayals.

Dtrack prohibits users of the platform to avoid capital controls of any kind and does not allow them to conduct contributions in foreign assets of any manner.

The information contained in this Whitepaper and on dtrack.org are of descriptive nature only, are not binding and do not form part of the terms and conditions of the Token generation event (hereinafter known as the "Terms"). In particular, you should be advised that the purchase of Dtrack Tokens may involve high risks

1. EXECUTIVE SUMMARY

This whitepaper explains the problem and solution to a new era of fitness., These days the larger part of us attempt to remain fit, however, we basically can't discover any inspiration to keep up or to begin. The issue is the absence of inspiration to practice in a quick paced society. dtrack is submitted and has built up the answer to persuade individuals with monetary compensation.

In order to accomplish this solution, we have developed the technology while also accomplishing the necessary partnerships.

The Dtrackproject enables users to get rewarded for their exercise. The dtrack App and Dtrack smartwatch using blockchain technology provides a new Proof of Exercise feature to its users with an in-body mining experience and a leaderboard with stats and transparency like any other blockchain explorer.

2. INTRODUCTION ABOUT THE PROJECT

2.1. WHAT IS DTRACK?

Dtrack is a complementary cryptocurrency that has been developed on ethereum Network to allow anyone, regardless of technical ability, easy access to cryptocurrency. Within a few minutes of installing the mobile app any user can see Dtrack being added to their wallet via the unique body (proof of exercise) mining experience. Nearly all cryptocurrencies are “mined” with specialist equipment. Dtrack can be obtained via the body mining experience, ie your app running on the background tracks your steps and heartbeats.

We've developed a fully functioning crypto coin with some very unique features. We've identified multiple enormous markets and we're developing a free iOS and Android app.

2.2. PROOF OF EXERCISE (POE)

The Dtrack Token introduces Proof of Exercise (POE). The POE is a smart contract-based rewards system that is activated by detecting locations in the geolocation coordinates smart contract and by tracking your steps and heartbeat via the Dtrack mobile App and smart contract to deliver block reward.

Token earning structure estimates, these are based on mining difficulty, therefore the more tokens you can earn the more valuable they will become.

Smartwatch integration; there is a mining technology in the dtrack app which enable the user to synchronize the application with the dtrack water-resistant smartwatch, this technology will proffer the flexible utility of the app cause the dtrack token is designed to be mineable from any distance and through any physical exercise, our technology will detect automatically with its sensors the varieties of mode that is in use and each mode will be mineable by the amount of distance covered per kilometre be it, swimming, sprinting, skating, the skiing, skydiving, racing, and driving, user will be able to switch between these modes.

Dtrack pair to pair VR exercise platform.

Our technology will provide an avenue for subscribers to place a bet on the virtual reality section of the application, individuals will place a bet against the avatar of themselves on the varieties of physical events, games, and social practices, these techniques will give game developers the opportunity to develop games related to physical exercises in the virtual world section of the application, each game will be thoroughly examined by our team of expert gamers before it will be showcased for subscribers to play, this will thus make it competitive for more than one individual to participate by betting directly against each other or indirectly staking on a particular gamer (avatar) to emerge, winner of the best base on the individual ratings, our major objective is to build an active but very competitive virtual life where physically challenged people can as well be a part of the mining process irrespective of their impediments.

2.3. OUR MISSION

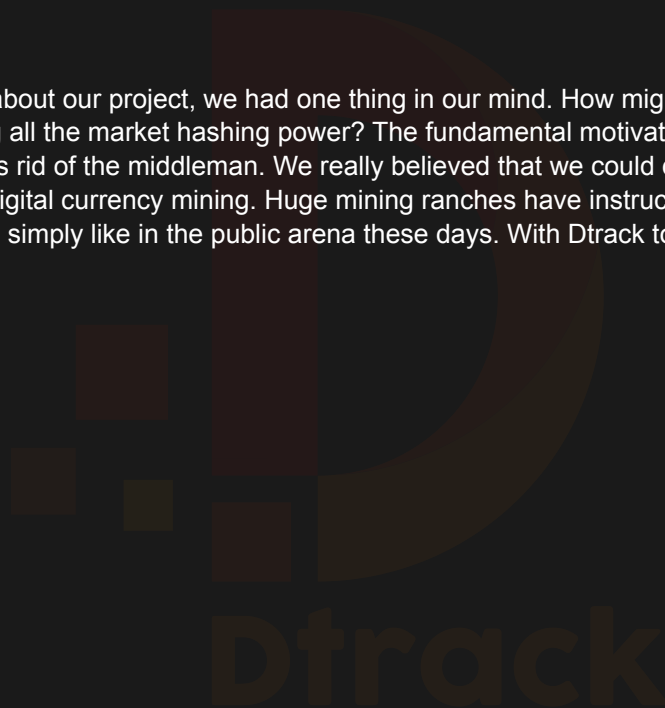

Our goal is to motivate people into exercising and becoming healthy with currency and to compensate them with the dtrack token.

2.4. OUR VISION

As a company our vision is to foster the global adoption of blockchain technology through fitness, we intend to persuade every individual to remain fit and as such causing global adoption of cryptocurrency.

2.5. WHY MINING?

Before we started thinking about our project, we had one thing in our mind. How might we prevent the enormous mining ranches from getting all the market hashing power? The fundamental motivation behind why we cherish digital currency is that it gets rid of the middleman. We really believed that we could dispense with the uncalled for conveyance technique for digital currency mining. Huge mining ranches have instructed us that the ones who have more cash, profit; simply like in the public arena these days. With Dtrack tokens, we are on the whole equivalent.

3. PROBLEM STATEMENT

Many individuals don't have sufficient energy or inspiration to practice in the fitness room. Many attempt diverse techniques like joining a pleasant rec center, persuading a companion to encourage, following advancement, and rationally compensating themselves. When we figure out how to drag ourselves to the GYM in the nighttime, we, for the most part, feel depleted from work, and the majority of the occasions you rather simply go home, watch TVs, and go to bed.

The most interesting part is that Exercising doesn't just strengthen your muscles, it also strengthens your heart and bones, lowers your blood pressure, and reduces your body fat. By addressing this problem, everyone will stay in shape, live a healthier life, look better, and also get paid in DTK token by using the dtrack app.

4. OUR SOLUTION

By leveraging the **Ethereum Blockchain**, we have developed a Decentralized Proof of Exercise token with an innovative mobile application that allows you to mine DTK token with your body.

The Dtrack platform will develop the dtrack mobile app that rewards users while exercising their body anywhere in the world by introducing a Proof of Exercise token called Dtrack token (DTK). The more exercise, and movement of the body, the more DTK tokens you will earn.

5. ABOUT THE DTRACK APP

Regardless of whether you're looking for inspiration to be more dynamic or you're as of now a wellness buff who wouldn't see any problems a couple of additional advantages for working out, Dtrack is an extraordinary method to gain rewards for moving practicing your body. As specified above, Dtrack is cryptocurrency you earn by exercise and movement of the body I.e walking, jogging, driving, swimming etc to earn DTK, you need to download the Dtrack mobile application and keep it running on your mobile phone regularly also you could get our partners smartwatch which will synchronized with the dtrack application, Whenever you walk or exercise your body , or by doing any activity it tracks your steps and heartbeat and pays you in dtrack and furthermore there will be an amazing feature in the mobile application which will allow it's users to switch modes I.e when swimming, driving or riding a bicycle you can simply switch modes in other to be on track, this mode will be added to the mobile application.

After accumulating enough Dtrack token, you will be able to redeem them for items like sports watches, Amazon credits, music downloads, eBooks, airline miles, or gift certificates to various retailers and also you will be able to exchange dtrack token on an exchange market for bitcoin and other cryptocurrencies. Offers constantly changed and are largely based on whatever deals dtrack has made with various retailers. Using blockchaintechnology transactions are all viewable and transparent on the dtrack mobile applicationavailable for free on both iOS and Android store upon launch.

Users need to be tied to their mobile phone, so if you take a walk and forget your device —or you're someone who prefers to jog without lugging along your phone — Dtrack got youcovered. there will be a way to synchronize the app with our partner's smartwatches orfitness trackers.

One of the future implementation of dtrack is the virtual reality, there'll be a VR version ofthe mobile app were user can also exercise, i.e doing the above already mentioned(walking, jogging, swimming and driving) simply by putting on their VR headset, and stillmine cryptocurrency (DTK TOKEN). lots of exciting features will be added in future updates.

Also, the application should dependably be running on your phone while moving or exercising your body. On the off chance that you swipe up or constrain quit, it quitsfollowing your means and heartbeat. Amazingly, it has a battery saver mode which itdefaults to when you initially download the application, however you do even now make a couple of ventures in the trade. we set to create for less battery life it really goes through.

6. DTRACK MARKET CONTEXT

Having the mission of taking blockchain technology to the world, we're targeting the 2.1 billion smartphone users.

The number of smartphone users is gauge to develop from 2.1 billion in 2016 to around 2.5 billion in 2019, with smartphone infiltration rates expanding too. A little more than 36 percent of the total world population is anticipated to utilize a smartphone by 2019, up from around 10 percent in 2011.

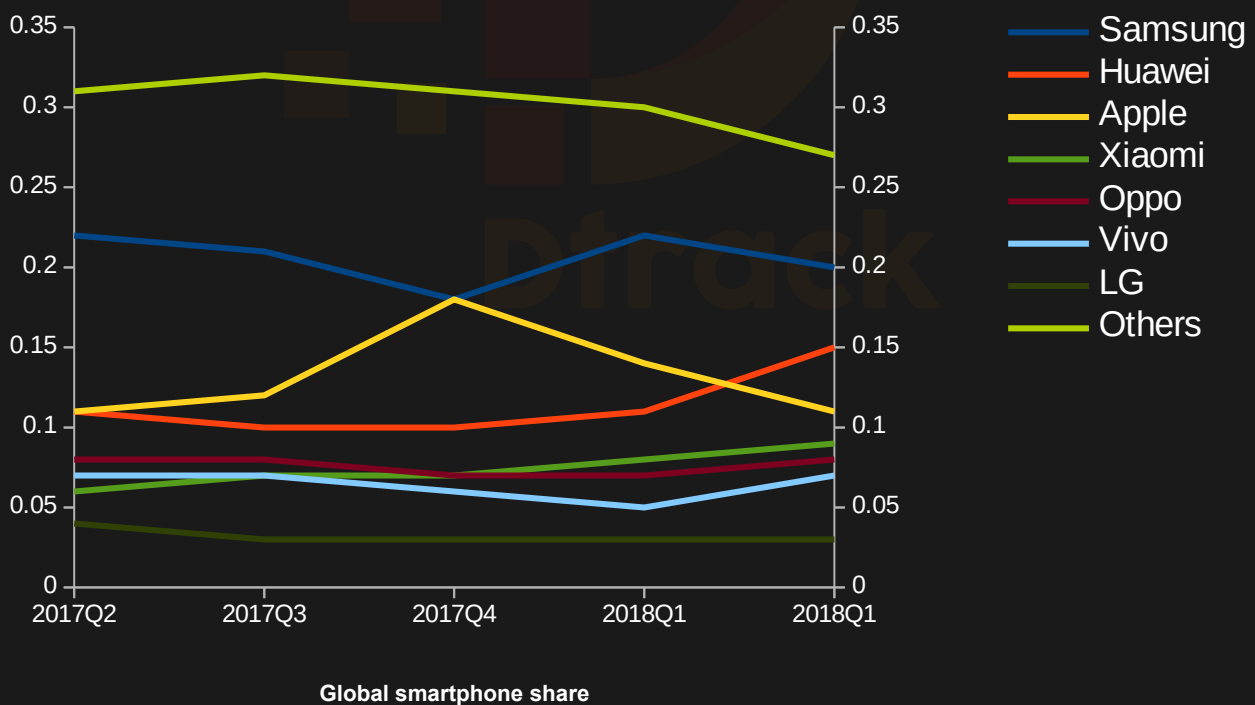

The data below show smartphone shipments;

Smartphone shipments declined 2% annually to 360 million units in Q2 2018.
The top 10 brands accounted for 79% of the smartphone volumes in Q2 2018.

Samsung led the smartphone market by volume with a market share of 20% in Q2 2018 even though it registered an annual decline of 11% due to weak sales of its flagship Galaxy S9 series smartphones.

Huawei shipments grew 41% annually in Q2 2018. The company managed to be the fastest growing (21%) smartphone brand amid a declining China smartphone market, and grew fully 71% overseas.

Apple shipped 41.3 million iPhones during Q2 2018, up 1% compared to the same quarter last year. iPhone X remains the top seller for Apple during the quarter.

7. MOBILE MINING (SUCCESS STORY)

The mobile mining experience is completely revolutionary way to earn cryptocurrency by “mining” on your phone. The fact remains mobile phone isn't really doing the hard work of mining the coins, that's already done, with “electroneum” being the first to develop the mobile cryptocurrency miner, and having 1 million+ downloads on Google and apple play store, this has been an eye opener to many people knowing that our phones can really such job with just having data turned on an app running on background, many entrepreneurs and developers have taken the opportunity to develop several mobile mining applications using different proofs, this urges us to start thinking of Dtrack another way to mine cryptocurrency with your mobile phone, and we believe with success of electroneum and other mobile miners Dtrack won't be exempted.

8. TOKEN ECONOMY

Dtrack token will be based on ethereum – a decentralized platform for applications that run precisely as modified with no shot of misrepresentation, oversight or outsider impedance. all transactions will be anchored with best in class cryptography, and the blockchain honesty will be secured by CPU-productivity.

The DTK token fills the dtrack platform by encouraging and anchoring business exchanges amongst users, Working as an API get to the key, the DTK token will fill a wide assortment of needs, including getting to information on the blockchain, starting exchanges and contracts, and remunerating framework members - to give some examples.

In order to get the above all stated on this whitepaper implemented, we're raising funds via public sale otherwise known as ICO.

The in-house calculations have resulted in a maximum financing target of a hard cap of 1808 ETH. The realisation of the project is not possible under this amount. Unsold tokens from the public will be burned.

The ICO will be of three stages, total of 3,000,000,000 DTK token to be sold on each stage;

Stage One 3,000,000,000 TOKEN 1ETH = 8,000,000 DTK 10% BONUS

Stage Two 4,000,000,000 TOKEN 1ETH = 6,000,000 DTK 5% BONUS

Stage Three 2,000,000,000 TOKEN 1ETH = 3,000,000 DTK 1% BONUS

HARDCAP 1808.75 ETH

SALES PROCEED ALLOCATIONS

Dtrack Ecosystem development 60%

Marketing 15%

Exchange listing 20%

Legal, buyback & admin 5%

DTRACK PLATFORM DEVELOPMENT: After the token sale, approximately 60% of the proceeds are scheduled for the Dtrack ecosystem. In total, when the Hardcap is reached, approx. 1083 ETH will be provided for the realization of platform, This allows us to create a platform with the highest security standards, the most modern technology and the best user-friendliness. The realization of this platform is carried out by internal and external experts. On current status, individual areas of the platform are already completed earlier.

MARKETING: The marketing during and after the token sale is a major ingredient for the success of any project. In this way the 15% fund allocated for this , we will use to invest in promising campaigns in order to get the maximum possible reach as far as possible. Duringand even after the token sale we are planning to add numerous articles, listing on well-known ICO websites, attending and hosting of blockchain seminars to create awareness for Dtrack. Since some countries have to be excluded during the token sale, we see a further market for supporters there after the token sale, which we will also address to the listing.

Exchange Listing: Having scheduled listing with our prominent exchange partners, 270.5 ETH will be set aside for exchange listing, we want to ensure the long-term listing of the DTK tokens on several well-known crypto exchanges. Targeting Chinese, Europe and America markets.

Buyback, Legal & Admin: Reserves should be made for unforeseen situations and serveas collateral. These funds are used to redeem their own tokens and to gradually implementthe platform., Part of the revenue flows into legal advice and administration. Both the tokensale and the Dtrack ecosystem are always accompanied by the current legal situation, and5% allocated for it. Furthermore, the capital is used for the moderating and coordination ofthe Dtrack community.

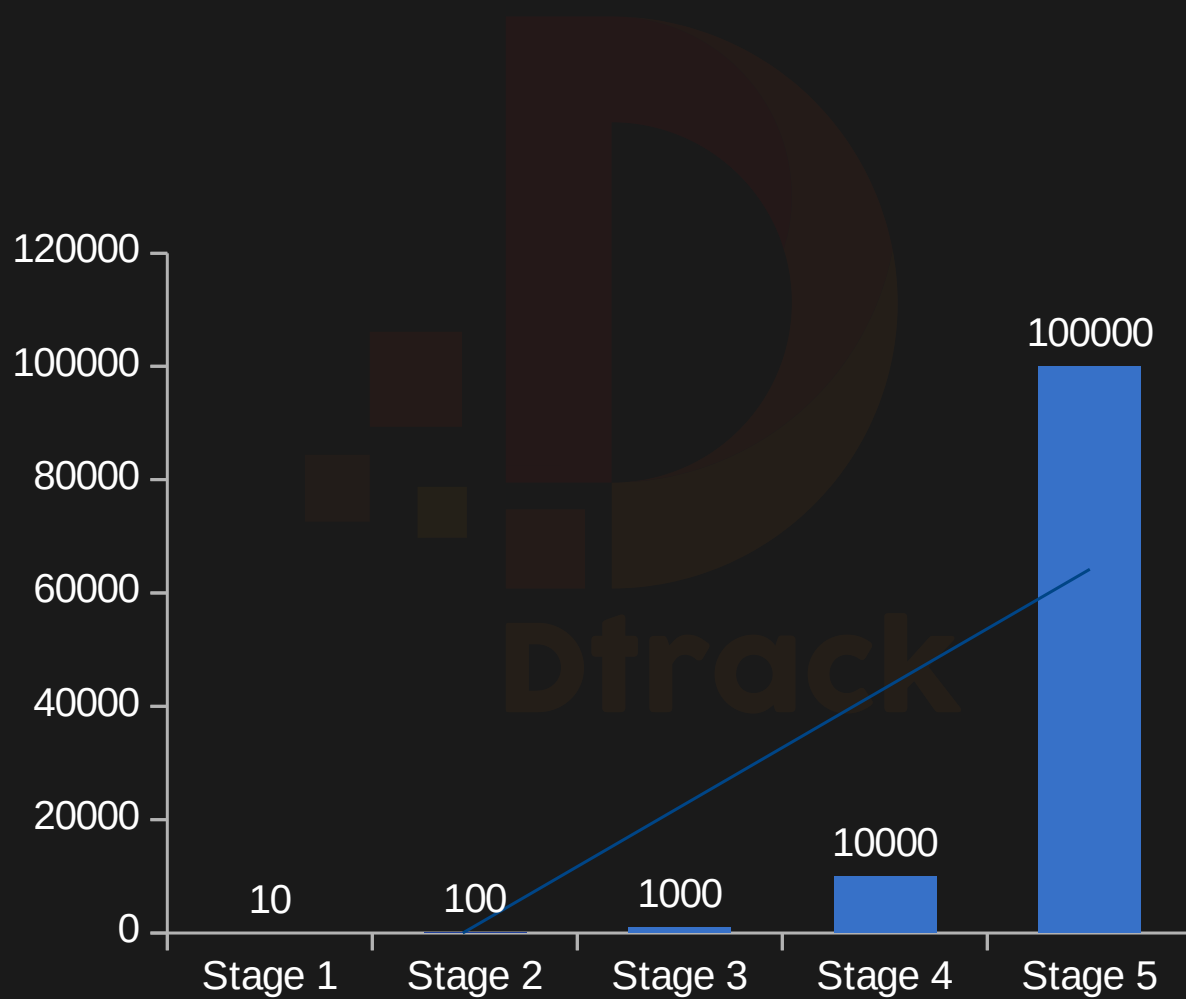

Name: Dtrack Token
Ticker: DTK
Type: Utility Token
Technologies: Ethereum /ERC-20
Dezimal: 18

Dtrack Token Allocation

9. MINING PROCEDURE

- 10 steps gives 1 DTK Token, After 400 Million DTK mine, it moves to stage two
- 100 steps gives 1 DTK after 600 Million DTK mine.
- 1,000 steps gives 1 DTK after 1 Billion DTK mine.
- 10,000 steps gives 1 DTK after 3 Billion DTK mine.
- 100,000 steps gives 1 DTK
- Please note base on our statistics it will take 100 years for the last stage to finish mining.

Stages of Mining and Its Difficulties
